TO PREVENT

EVEN INTERNAL

(H3)

DISSENT, AS

WELL AS LEAKS

TO OUTSIDE;

(see "the

Head", "War

Council"

("Key Range
Plans")

(my presentation)

Once a policy has the stamp of approval
of an American president, acting on the allegedly
consensual advice of his main advisors,

it becomes practically impossible for it to be
perceived as ^{or effectively seemed} ~~an~~ ^{being} ~~inquired~~ ^{being}
innocent, criminal or criminally reckless.

(esp. in case of nat. sec. - war)

Charges to that effect - once the policy is
underway with that content - stamp ~~the~~ ^a ~~work~~
critics as extremist, fanatic, wagtail, antirealist
the value of legitimate opinion or discourse, if
not unproductive or anti-American.

DISCREDIT + MARGINALIZE THE ACCUSER

(see ^{or} that on opposing a war once underway)

see "the
hoop")

The policy can be seen as mistaken, inappropriate
or non-optimal or likely to fail, ^{inadequate and} ~~though~~ ^{though} ~~for~~ ^{unavoidable}
though well-intentioned. Aspects that seem blatantly
illegal can be charged to the zealotry of
subordinates.

But to get on innocent, criminal or criminally reckless
policy underway and protected from effective challenge
(as big push) what is necessary & sufficient is to
keep it ^{substantially from the public and antirealist efforts} ~~secret~~ ^{of it}
for as long as possible - ideally until it has "succeeded"

(or failed) - preventing or effectively discouraging any leaks
about internal conversation or preparation and
especially of any internal dissent - until it emerges to
public awareness, if at all, as a fait accompli endorsed by

For any org/

or leader:

This enlarges
the set of

"options"

(Preamble
without being

specific cost

or arising

preclusion

opposition)

Enlarges

power,

means.

(But values

do/or's realize

of the preamble,

consequences,

or consider

about aims,

values...)

Expected feedback is prevented - switched off

(see DE to Hove on safety switches)

(Need not to know)

to order certain expected policies (e.g. unacknowledged secret, price

personal benefits) preamble for leader

corrupt!

to try;

and prospects of success, for him (or for nation)

do not have to be high, nor prospects of disaster

low, for him to adopt (secretly) a criminal, immoral

or "killing reckless policy

(not in his eyes, given the

corrupt values of the harmful decision-maker -

that's why saying "he's right" is corrupt

if/when it satisfies his aims & values & interests

is not adequate

(secretly)

(both & both: lets burden off the back,

and legitimizes "what the leader wants" +

(If say: you can entirely center values, principles,

UN-M utilities, as "wisdom"

or criminal, immoral

Barron & Luzzo

just as you can attempt to evaluate "waste,"

despite certain harmful "purposes" that would

make it effort & effort.

(yes, there are dangers in this, too.)

Are MATH or HAR: "Find out what the bus. wants
to do, and recommend it"

(or, how to do it — no constraints of
law, cost, delays, costs
(you))

If you don't know what he wants, to
several purposes and what he knows...

Here, failure of harvest, control of internal feedback:
identifying a bus choice as an error

or perceiving "error" (life-line) in its operation

is itself a degree of fatal error in the
"moving instance" — if his job/interest depends
on the boss & his pleasure in his reputation

Repeating "error" (or failure, mistake, misperception
by superior, civil)

as dangerous to movement

- human component is "central,"

"self" - connecting system

- not really, if it involves
a net/hierarchy of
humans

no one = "self" of system

Compare VN, Iraq, Afghanistan

or we are here

[or, sea of fossil fuels?]

or approach to WWII

as a giant PONZI scheme

for Bernie Madoff - or other Masters of
the Universe, SARON, Arthur Andersen, etc -
really less more innocent or criminal

than my Administration, Pres, CW Managers

see housing bubble, sub-prime mortgages,
derivatives 8+L accounts frauds

≈ we are here

stagnate - posthumous

confining in one brain or group

schmuckers, billies, cunning, grasp
of realities

with ignorance, stupidity, idiotic fantasy,
(["]borderline psychosis; narcissism; paranoia;
megalomania; detached from reality;
day alone; schizophrenia; suicidal behavior;

most (^{esp.} ment) not. see. schemes confine
data schmuckers (in terms of present interests
& special knowledge)

and craziness, stupidity, ignorance, ~~unwillingness~~
(simplicity, evil)

Security may be essential

- MP

- Radar system

= Breaking German + Japanese codes

(SU?!)

can control?

KH + T?

which Count Octopus?!

Security is essential but it always has dangers

and constraints

connections

feedback
secretly

at which may be very great

which

are usually unrecognized

If recognized, they could often be countered,
or minimized (if special efforts, possibly
secretary)

or the security could be terminated, with

limits

and little risk or damage

and it should never be permanent, or long

like power

and never

absolute, unmonitored or unappealable

Security concepts
